## 2024\_28\_III\_OOPS Using Java Lab

### 2028\_REC\_OOPS using Java\_Week 3\_Q4

Attempt : 1  
Total Mark : 10  
Marks Obtained : 10

#### Section 1 : Coding

##### 1. Problem Statement

Sesha is developing a weather monitoring system for a region with multiple weather stations. Each weather station collects temperature data hourly and stores it in a 2D array.

Write a program that can add the temperature data from two different weather stations to create a combined temperature record for the region.

##### ***Input Format***

The first line of input consists of two space-separated integers N and M, representing the number of rows and columns of the matrices, respectively.

The next N lines consist of M space-separated integers, representing the values of the first matrix.

The following N lines consist of M space-separated integers, representing the values of the second matrix.

### ***Output Format***

The output prints the addition of the two matrices in N rows and M columns, representing the combined temperature record.

Refer to the sample output for formatting specifications.

### ***Sample Test Case***

Input: 3 3

1 2 3

4 5 6

7 8 9

1 1 1

2 2 2

3 3 3

Output: 2 3 4

6 7 8

10 11 12

### ***Answer***

```
import java.util.Scanner;

public class Main {
    public static void main(String[] args) {
        Scanner scanner = new Scanner(System.in);

        int n = scanner.nextInt();
        int m = scanner.nextInt();

        int[][] array1 = new int[10][10];
        int[][] array2 = new int[10][10];

        for (int i = 0; i < n; i++) {
            for (int j = 0; j < m; j++) {
                array1[i][j] = scanner.nextInt();
            }
        }
    }
}
```

```

for (int i = 0; i < n; i++) {
    for (int j = 0; j < m; j++) {
        array2[i][j] = scanner.nextInt();
    }
}

int[][] resultArray = new int[n][m];

for (int i = 0; i < n; i++) {
    for (int j = 0; j < m; j++) {
        resultArray[i][j] = array1[i][j] + array2[i][j];
    }
}

for (int i = 0; i < n; i++) {
    for (int j = 0; j < m; j++) {
        System.out.print(resultArray[i][j] + " ");
    }
    System.out.println();
}

scanner.close();
}
}

```

**Status :** Correct

**Marks :** 10/10
